

1.
 - a. Write a C program to find total and average of 'n' students using structures.
 - b. Write a C program to implement Merge sort using arrays.
2.
 - a. Write a C program to copy one structure variable to another structure of the same type.
 - b. Write a C program to implement Quick sort using arrays.
3.
 - a. Write a C program to read student name and marks from the command line and display the student details along with the total.
 - b. Write a C program to implement Radix sort using arrays.
4. Write a C program to implement Stack and its operations using arrays.
5. Write a C program to implement Queue and its operations using arrays.
6. Write a C Program to implement insertion operation on data using Single linked list.
7. Write a C Program to implement insertion operation on data using Double linked list
8. Write a C Program to implement insertion operation on data using Circular linked list
9. Write a C Program to implement deletion operation on data using Single linked list
10. Write a C Program to implement deletion operation on data using Double linked list
11. Write a C Program to implement deletion operation on data using Circular linked list
12. Write a C program to implement Stack and its operations using linked list.
13. Write a C program to implement Queue and its operations using linked list.
14. Write a C program to implement Circular queue and its operations using arrays.
15. Write a C program to evaluate postfix expression using stack
16. Write a C program to perform insertion and deletion operations on Binary Search Trees
17. Write a C program to implement Binary Search Tree traversals.
